Conference Description: The 56th Annual OB/GYN Spring Symposium will provide engaging, evidence-based updates on a range of obstetrical and gynecological challenges, aimed at enabling clinicians to update their practice, improve the quality of care for their patients, and optimize patient outcomes and satisfaction. The symposium focuses on enhancing participants' knowledge of new evidence and trends in the field and highlighting practical applications for this knowledge. Conference faculty include nationally known guest faculty and distinguished MUSC faculty. Content is chosen for this CME activity based on needs assessment and educational gaps derived from local, regional and national data including peer review, literature updates and specialty society information. Content is presented through key updates on emerging topics, expert presentations, and interactive panel discussions. Please see the agenda for a detailed description of topics and learning objectives to be addressed within this two day conference.
